Trần Gia Thế

Software Engineer

Xuan Phuong, Nam Tu Liem, Hanoi | 0394631391 | giathe0901@gmail.com

PROFILE

Final-year ICT student at USTH with experience building **backend services and web applications** using C#/.NET, Python/FastAPI, REST APIs, and SQL databases. Developed real-time application features, role-based access control, and data management workflows; deployed applications with Docker on Linux. Additional project experience in RAG-based document search and question answering. Seeking a **Software Engineer** role focused on backend systems and practical product development.

TECHNICAL SKILLS

Programming: C#, Python, C/C++
Backend: C#/.NET 8, FastAPI, REST APIs, SQLAlchemy, WebSockets
Databases: SQL Server, PostgreSQL
Architecture & Security: Clean Architecture, JWT authentication, role-based access control
Frontend Integration: React, Next.js/TypeScript
Deployment & Tools: Docker, Docker Compose, Linux, Git/GitHub, Jira
AI Foundations: Retrieval-Augmented Generation (RAG), semantic search, Qdrant
AI-assisted Development: Codex, Antigravity, Claude Code (CLI); code review and validation

WORK EXPERIENCE

Intern | VinRobotics Sep 2026 - Oct 2026

- Studied Vision-Language-Action (VLA) models and their training and inference workflows.

Developer Intern | ODIN Apr 2026 - Jun 2026

QuizBattle - Real-time multiplayer quiz platform | GitHub

- Led a three-member team building a **Python/FastAPI** quiz platform with **JWT authentication, WebSockets**, real-time game loops, and live leaderboards.
- Managed development tasks in Jira and packaged the application with **Docker Compose**.

SELECTED PROJECTS

SecureRAG Enterprise - AI Knowledge Workspace May 2026 - Aug 2026

USTH Capstone Project | Backend architecture, access control & deployment | GitHub
Project stack: C#/.NET 8, SQL Server, React, Qdrant, Docker

- Built a **C#/.NET 8 backend** with **Clean Architecture**, **role-based access control**, and SQL Server.
- Packaged an Electron desktop application and containerized **five services with Docker Compose**.
- Built a RAG-based assistant for semantic search and question answering over enterprise documents.

TeleCollect - Demonstration Data Platform Jun 2026 - Aug 2026

VinUniversity x Vingroup Applied AI Program | Backend, frontend integration & deployment | Demo
Project stack: Python, FastAPI, SQLAlchemy, Next.js/TypeScript, Docker

- Built **FastAPI/SQLAlchemy services** for demonstration upload, review, and dataset packaging, including checksums and ranged downloads.
- Integrated **Next.js/TypeScript** workflows with backend APIs for demonstrations, tasks, users, and media.
- Deployed a staging environment on a **Linux VPS** using Docker Compose and Caddy, with HTTPS, health checks, persistent storage, and backup/restore workflows.

EDUCATION & TRAINING

University of Science and Technology of Hanoi (USTH) Sep 2022 - Expected Dec 2026

Information and Communication Technology (ICT)

Bach Khoa Aptech Sep 2023 - Nov 2025

Web Development
